If any 'don't knows' have been identified, at what point will impacts on these groups become identifiable?

If the impact will be carried through their impact on the project. Mitigation can be implemented.

How has 'due regard' been given to any negative impacts that have been identified?

In each case, the significance of the impact has been assessed.

It is clear that there are a range of impacts. The impact of the project on the environment (because of the delay in the project) has been assessed. The impact of the project on the environment has been assessed.

In the case of the impact on the environment (above) that has been assessed. The impact of the project on the environment has been assessed. The impact of the project on the environment has been assessed.

- The impact of the project on the environment has been assessed. The impact of the project on the environment has been assessed. The impact of the project on the environment has been assessed.

Is this proposal likely to have any knock-on effects for
