

**AREA PERFORMANCE REPORT – FQ2 2023/24**

---

**1.0 BACKGROUND**

1.1 This paper presents the Area Performance Report for Financial Quarter 2 2023/24 (July to September 2023) and illustrates the agreed performance measures.

1.2 The features of the Performance Report are as follows:-

Indicators are grouped by Corporate Outcome.

The data table for each indicator is coded to identify the level of reporting.

- o Area level measures are blue
- o Council level measures are grey
- o COI measures are white

Each indicator details the

- o Target, Actual and Performance status (Green / Red / No Target) for the current and four previous financial quarters.
- o Commentary for the current financial quarter only.
- o Narrative explaining the performance trend e.g. This indicator is above Target and performance has improved since the last reporting period.
- o Where appropriate a Performance Trend Line has been added.
- o The name of the Responsible Officer.

1.3 The commentary for each indicator helps 'Tell Our Story' and enables Members to put the performance data into perspective and identify what is local in nature or should be escalated up to a Strategic Committee.

1.4 To improve the response to performance queries, it is requested that the Responsible Named Officer or Sonya Thomas are contacted when a Performance Report is received with any queries. This ensures queries being resolved or clarified prior to the Area Committee meeting therefore being carried forward as Actions at a subsequent meeting.

This indicator for FQ2 shows the cumulative amount of income collected is significantly lower than the cumulative target. There is no performance trend as this data is cumulative.

### FQ2 Comment

The purpose for car parking charging is to effectively manage vehicular traffic in and around our town and is not about Income Generation. Our current predicted outcome is based on data over several years which has now been skewed by Covid. Our vehicle count for the whole of ABC is approx. 10% less than pre-Covid which will also impact on the potential income. However, other factors such as the weather and cost of living crisis will also have an impact as well as fuel prices. When there are any known reasons that could affect potential income, these will be noted in advance to the Committee.

Going forward the Committee are asked to note the following factors that will affect car parking income:

B&C: Coal Pier has (incomplete) electric charger installs (from FQ2) which is affecting 8 bays.

H&L: Glen Loin 2 has (incomplete) electric charger installs (from June), which is affecting 6 bays. Glen Loin 2 also has toilets/recycling bins reducing bays (from FQ1 onwards).

MAKI: No issues.

OLI: Corran Halls 1 has (incomplete) electric charger installs (from FQ1) which is affecting 15 bays. North Pier car park closures for cruise ship visits (FQ1 onwards).

All Areas: As agreed at Full Council car parking charges will be suspended for the two-week period prior to Christmas day. Winter festivals, Christmas light switch on events which are in line with historical practice.

*This measure only relates to planning applications received for alterations to existing premises.*

Performance across Development Management continues to be impacted by an extended period of operating with key staff vacancies and a backlog of casework from the pandemic. The introduction of National Planning Framework 4 in February 2023 by The Scottish Government and the subsequent progression of the Council's proposed Local Development Plan 2 in June 2023 has further impacted on productivity and required a significant volume of casework to be re-assessed against the emerging policy background. #### FQ2 Comment

**FQ2 Comment**

We maintain 14,442 street lights throughout Argyll and Bute, including the islands. Some street lighting faults cannot be fixed by the Street Lighting Team and we require assistance from power suppliers (SSE or Scottish Power) or our Roads colleagues/external contractors to repair underground cable faults and power supply issues. These type faults are often reported as single dark lamps but following attendance/investigation they can be identified as more serious problems that will take longer to repair. On average throughout the year approximately 98.8% of our street lights are operating/functioning as designed. Our Maintenance Team comprises 3x Street Lighting Electricians, 1x Clerk of Works/Inspector and 1x Trainee Team Leader. At present around 95% of assets have been upgraded to Energy Efficient and more reliable LED Luminaires. Works are continuing to convert/upgrade the rest of our inventory.
